Me and my tech stack

UX designer with **18+ years of experience**, working across industries from fintech and public broadcasting to government services. I care about clarity — making things work well for real people in real situations. Today, I work as a fully AI-native designer — I prototype with AI, run AI-assisted research, and build custom tools and automation workflows. I operate my own AI server with orchestrated agents — turning a one-person studio into a full product team.

My AI development infrastructure is built on a Mac Mini M4 Pro (64 GB unified memory), accessed remotely via SSH. I use OpenClaw for multi-agent orchestration, Claude Code (Max) and OpenAI Codex as primary coding backends, and Ollama for local model inference. The server runs specialized AI agents for product management, development, testing, security auditing, and UX simulation — all operating in parallel.

Experience

Ernst & Young (Ministry of Labour and Social Affairs)

Senior UX Designer

Feb 2026 - now

I work on multiple digital products across the ministry's portfolio. My main focus is Jenda (public-facing application for social benefit applicants) where I handle UI refinements, content adjustments, and UX improvements based on feedback from caseworkers and applicants.
I also contribute to Lístečkomat, Workflow (an internal tool for reporting and managing external IT workers), and Dashboard (an application supporting daily tasks of office staff). Beyond hands-on design, I am involved in preparing an analytics strategy for the Labour Office web using Posthog.
Working directly with a large government institution gives me a deeper understanding of designing for complex administrative processes and diverse user groups, from citizens to internal staff.

The central government authority responsible for social policy, social insurance, employment, labour legislation, and occupational safety. MPSV oversees key subordinate organizations including the Labour Office, Czech Social Security Administration, and the State Labour Inspection Office, serving over 20,000 employees across the country. The ministry drives national strategies in employment, pension security, social care, and EU fund distribution.

Austrian Public TV

Digital Designer

Mar 2024 - Oct 2025

ORF is undergoing a comprehensive update of its streaming platforms (iOS/Android, Web, Apple TV, Google TV, Amazon Fire). I was hired as an external designer to deliver high-fidelity Figma files based on a defined design and branding system.
I gained valuable experience designing for various new devices and enjoyed testing the designs live on TV screens. It was an incredible opportunity to work on a large-scale project used by millions of people daily.

Austria's national public broadcaster, ORF, is a leading media organization providing TV, radio, and online content. With thousands of employees, it dominates Austria's media landscape, delivering cultural, educational, and entertainment programming that significantly shapes public opinion and culture.

Akcenta

Head of Design

Mar 2023 - Jan 2024

I worked as the Design Lead at a czech finance company, where I managed a small team. Our main focus was to update our banking system, developing a new app, and improving the public website. I also handled animations and gathered feedback from users to make sure designs work well for them.
But what really motivated me was helping my team grow. I enjoyed mentoring and sharing my knowledge to improve our design skills together. We were all about learning and getting better every day.

Akcenta is a financial services company specializing in currency exchange, payment processing, and hedging solutions. Focused on Central and Eastern Europe, it supports SMEs with cost-effective solutions for cross-border trade, fostering economic connections in the region.

ÖBB - Austrian Railways

UX Designer (contract)

May 2020 - Feb 2023

Railcargo

Hands on a brand new digital cargo system called MIKE. All systems used for managing train transport were brought step-by-step together in a modular system - from invoicing to maintaining dangerous goods.
Performing specific user-test session with people who were supposed to change their work behavior from Excel to a native digital experience.

Personal Transport

The ÖBB offers various digital channels for ticket sales. The objective was to analyze these channels and create a design system. In my role, I established an efficient workflow, selected tools for designing the system, and facilitated a seamless handover for development. Additionally, I contributed to daily operations and led several user-testing sessions.

ÖBB, Austria's national railway company, handles passenger and freight transport across the country and beyond. Employing over 40,000 people, it plays a vital role in Austria's infrastructure and sustainability efforts, promoting green transportation solutions for millions annually.

Deutsche Bank

UX Designer (contract)

Jan 2017 - Dec 2018

Frankfurt, 2 years

In charge of the Deutsche Bank mobile iOS/Android banking app, I handled the creation of prototypes and UI. Collaborating within an agile international team of developers, analysts, testers, and designers, I navigated projects in both English and German. Additionally, I managed the Design Guidelines and gained valuable insights into agile working methods.

Deutsche Bank is a global banking giant offering services in retail banking, investment banking, and asset management. With operations in 58 countries, it is one of the world's largest financial institutions, shaping global finance through its innovation and industry influence.

Economia

Senior UI Designer (full)

Apr 2015 - Sep 2016

Prague, 1.5 years

At Publisher Economia, my main responsibility involved a comprehensive redesign of the online magazine aktualne.cz, with a particular emphasis on optimizing for mobile devices. Additionally, I took on the challenge of revamping the woman-oriented lifestyle magazine zena.cz.

Economia is a Czech publishing house known for producing business-focused newspapers, magazines, and digital content, including Hospodářské noviny. It is a key player in Central Europe's media industry, shaping business and economic discourse in the region.

Taste Digital

Freelancing

Dec 2011 - Mar 2015

Prague, 5 years

For a couple of years, I ran my own business, creating digital advertisements for different clients, including renowned companies such as VCCP, Holba, Pilsner Urquell, Wiglaf Pricing, Catworks, and Dobrý Anděl.

Hullabaloo

Digital Project Manager

Dec 2010 - Oct 2011

Prague, 10 months

Managing online campaigns and developing digital products, including microsites, online games, and apps, was a significant part of my role. I collaborated with notable clients, including Samsung, Unilever, Kraft Foods, and Jeep. Additionally, I successfully oversaw a substantial social campaign for the European Parliament.
